

# Novel Applications in Polymers and Waste Management

Edited by Badal Jageshwar Prasad Dewangan,  
Edited by Maheshkumar Narsingrao Yenkie

This book focuses on exciting new research in polymer science. The first section of the book deals with new advancements in polymer technology, which includes polymers that are responsible for progress in the field of energy, electronics, and medical sciences. It focuses on the most promising polymer nanocomposites and nanomaterials. Composites are becoming more important because they can help to improve quality of life. The second section of the book highlights this aspect of macromolecules, while the third section emphasizes biopolymers, their development, and applications.
